Education

1337 Coding School (42 Network)

2023 – Present

Software Engineering Student

Morocco

- Project-based curriculum focused on algorithms, systems programming, and software engineering
- Strong emphasis on peer-to-peer learning, problem solving, and clean code

Mohammed V University (Faculty of Sciences)

2018 – 2023

Bachelor Degree in Physics & Electronics

Rabat, Morocco

- Strong analytical background with focus on mathematics, logic, and electronic systems

Experience

Freelance Web Developer

2022

Self-Employed

Remote

- Designed and developed small to medium web applications for clients
- Built responsive user interfaces using modern HTML, CSS, and JavaScript
- Collaborated directly with clients to gather requirements and deliver solutions
- Managed full project lifecycle from planning to deployment

Collaborative Software Projects — 1337 Coding School

2023 – Present

Software Engineering Student

Morocco

- Worked in team-based projects following peer-to-peer and agile-like workflows
- Developed **ft_transcendence**, a full-stack web application with real-time features
- Implemented backend services, authentication, and frontend components
- Built **webserv**, a custom HTTP server in C++ following RFC standards
- Used Git and code reviews for collaboration and version control

Projects

Pong-Chess Platform | JavaScript, React, Vite, Tailwind CSS, Node.js, Fastify, SQLite

- Built a full-stack web application allowing users to play Pong and Chess online
- Implemented user authentication, matchmaking, and tournament system
- Developed REST APIs using Fastify and managed persistent data with SQLite
- Designed responsive and modern UI using React and Tailwind CSS
- Handled real-time game logic and client-server communication

WorldWise App | React, CSS Modules, Geolocation API

- Developed a web application to track and memorize cities visited by the user
- Integrated browser Geolocation API to capture user location
- Implemented interactive map-based UI with city notes and timestamps
- Used CSS Modules for scoped and maintainable styling

Personal Portfolio | React, TypeScript, Vite, Tailwind CSS

- Designed and developed a personal portfolio to showcase projects and skills
- Built reusable and modular React components with clean architecture
- Implemented animated NPC character using sprite-based animations
- Focused on performance optimization and responsive design
- Deployed and maintained the portfolio using GitHub Pages

Technical Skills

Languages: C, C++, JavaScript, TypeScript

Web Development: React, Node.js, Fastify, HTML, CSS, Tailwind CSS, CSS Modules

Databases: sqlite, mysql (basic)

Tools & Systems: Git, GitHub, Linux, Bash, Docker (basic)

Concepts: Algorithms & Data Structures, OOP, REST APIs, Client-Server Architecture
